

Strong sales appeal, secure tool support!

The ideal packaging solution for heavy masonry drills

- attractive, 'eyecatching' product presentation through modern design, and transparency of at least one part of the tube
- dual 'bayonet-style' closure holds heavy tools securely in place
- variable length adjustment
- shock absorbing 'concertina' tube walls close down firmly on each end of the tool, preventing any movement of the tool within the packaging
- special interior geometry of the inner tube section provides additional protection for the drill point
- sturdy integral hanging loop
- lends itself to automated loading

Raw material

- Polyvinylchloride (PVC)

Product range

- please enquire for various attractive colours, two-coloured and clears

Packing

- outers and Inners packed separately in individual cartons
